Some of you may know me through my semi-permanent residency at AT4. Some of you may have seen my posts on various CS groups. Hopefully though, you'll all get to know me as Alexandra, your 1$^{st}$ year representative. My reason for running is rather simple: I want to give a voice to first years with all their enthusiasm, energy, and excellence.

This wouldn't be my first time helping organize events and represent a group of like-minded people – as coach of my robotics team, I did exactly that for several years. A highlight of that experience was that I helped our team get a sponsorship from a pizza company. My involvement with the Developer Student Club has also helped me understand the inner workings of CompSoc and how to best work with the existing committee members. So not only can you call me a pizza logistics veteran, but also an expert on persuasion so Findlay doesn't break your legs.

What's more, talking to people is one of my favorite things to do. As 1$^{st}$ year representative, I would always keep in touch with what my classmates think of CompSoc or want to see in the future. My proactivity and enthusiasm will ensure that event planning goes smooth and that first years really will have a say within the committee.

Though I currently take no sides in the pineapple on pizza debate, I am more than willing to sway my opinion if my voters lean one way or another. So vote for me and get your voice heard in this life altering dispute!
